

NoTouch Assist Key

A simple hygienic and convenient solution to reduce the risk of contamination

- Press ATM's
- Call the elevator
- Operate ticket machines
- Flush public toilets
- Press pedestrian traffic buttons
- Push or pull open public doors

Frequently touched public surfaces carry a high germ load, making you prone to bacterial and viral contamination.

Avoid the risk of contamination using our newly developed NoTouch Assist Key.

Pull open doors, call the elevator, press pedestrian traffic buttons, all without direct physical contact.

Made from 100% post-consumer waste plastic, the NoTouch Assist Key features a highly functional design with the added convenience of being safe, hygienic and easy to use.

Vastly reduces point-of-contact area keeping the risk of contamination at bay.

FEATURES:

- **Functional Design:** Works for door handles, drawers, levers, elevator buttons, teller buttons.
- **Sustainable Material:** Made from 100% post-consumer waste plastic.
- **Convenient:** Small and simple, easy to carry and use.

Combine these aspects with a low-price point and you have the ideal safety tool for internal usage, a solicitous gift for your customers or employees, or a pensive promotional item for your relations.

Customized keys featuring embossed brand logos or messaging are also available upon request.
